the Orderly Room. From No 8 Sta: H. 12/6/17. Since admission
has been Excitable, obstinate & suspicious: resents any
interference, or being told what to do. Becomes abusive &
uses filthy language. Is inclined to be threatening. Talks
to imaginary people. Is exalted believes he has been
selected by God, for some great work. God put "rays" on
him, & he felt Gods Power coming into him & changing
him into a divine being. Thinks he is to be a Second
Christ. Hears God talking to him & telling him what to do.

14/6/17. On admission: Restless & confused. Appears to treat
everything as a joke.

15/6/17 On Examination: This patient is exceedingly delusional
& I am unable to obtain any suitable answers to questions.
When asked where his home is, he says anywhere he hangs
his hat. Appears to have been under fire. He has
hallucinations - talks to imaginary people. Tells me
he knows he has been selected for a great mission by the
Almighty & he constantly feels the power of God being
put into him. Fairly nourished - pupils react.

R. J's. normal. No tremors.

No. **225232** Rank **Private** Name and Corps of disabled Soldier:—
ANSELL, Alfred - 43rd. Battn.
Previous civilian occupation:— **Labourer.**
Cause of Disability:— **Convalescent from delusional insanity.**

Condition, in detail, which prevents the soldier earning a full livelihood:—

Eight months in France. This man enlisted in August 1914 with the 4th. battalion and was discharged in Nov. 1914 for nervous breakdown. He re-enlisted in August 1915 with the 81st. Battn. All the reports of different M.O's attached, show that he was at different times irrational, excitable, and abusive, with religious delusions. On examination: he has a good insight into his past condition. He fully realizes that his past ideas have been delusions. He speaks rationally and gives a good account of himself. No signs at all of ~~the~~ nervous condition, no tremor. Wassermann negative. Well nourished. Heart Lungs & Other Organs normal.

OPINION OF THE BOARD.

Degree of incapacity. (Please state in fractions) **1/10th.**

Probable duration of incapacity:— **three months.**

Capt. J.E. Montgomery, CAMC.
Lieut. J.F. Edis, CAMC.

The Board having assembled pursuant to order, proceed to examine the above mentioned man and report that:

1. Present condition: This patient appears to have a fair insight into his case. We are unable to find that either hallucinations or delusions are at present existent. His attention is readily attained and well maintained; his memory is clear and accurate, and his judgement appears to be normal. In looking over this man's documents it would appear that when he was admitted to the Hospital in England, he was more or less confused and exhibited delusions and was also somewhat restless. Patient is evidently improving and should continue to improve with further treatment.
Diagnosis - Dementia Praecox.

2. Extent to which his capacity is lessened for earning a full livelihood in the general labor market at present.

100% at present.

3. Probable minimum duration of the disability:

6 months.

4. Whether treatment in a convalescent home would materially assist his recovery.

Yes.
