Damaged muscles removed also head of radius. Patient too ill for complete excision. Given 1 pint Sodium Bicarb & Glucose 4%."			
	Patient reached USA Base Hospital No. 5 August 20th, at 8 P.M. fair shape, temperature 101.5			
	Examination shows			
	(1) A number of partly operative, torn, lacerated, dirty wounds beginning at the top of the left buttock reaching downwards on the left leg externally, and also a few on the internal surface, all more or less sutured, some gauze packed. The infection which is present in all of them, the wounds being filled with a pussy discharge, seems to be rather superficial and well localized. Gauze drains removed, wounds clean, Eusol dressing.			
	(2) Right leg, immediately over knee cap there is a 1/2" incised wound apparently clean, where superficial F.B. had been removed. Dry dressing.			
	(3) Arm in Bowlby inner angular wooden splint. Examination shows a 12" loosely sutured incision beginning 1" above elbow and running down inner surface of the arm, considerable purulent and serous discharge from wound, but no signs of any spreading or extending infection. Wound cleaned up, Eusol dressing, Jones wire arm splint applied.
