CLASSIFIED LIST OF OTS PRINTED REPORTS

Compiled by
O. Willard Holloway and Oliver B. Isaac

**Reports Division
October 1947**

INTRODUCTION

This classified list catalogs about 1,800 reports on German technology prepared by American investigators who have searched German firms and laboratories over the past two years for information of value to American business and industry. Unlike most OTS reports, which are available only in photostat or microfilm, the reports listed here are available in mimeograph, multilith, or other printed form. Included are the bulk of the reports received from the U. S. Army's Field Information Agency, Technical, the Combined Intelligence Objectives Agency, and the Joint Intelligence Objectives Agency. The list refers the reader to the page number of the *Bibliography of Scientific and Industrial Reports* where abstracts of reports are found.

For convenience this publication is arranged in three parts:

- PART I Classified list of reports giving author, title, date, pages, price, PB number, volume, and page reference to the *Bibliography of Scientific and Industrial Reports** where an abstract of the report may be found.
- PART II Series list naming the series included with reference to the PB number.
- PART III An index from PB number to the page number in the publication where the complete entry may be found.

All of these reports are available from OTS in printed form. Reports should be ordered from OTS by PB number, and the order should be accompanied by a check or money order made payable to the Treasurer of the United States.

*The "Bibliography of Scientific and Industrial Reports" is a weekly publication prepared by OTS containing abstracts of 1,500 scientific and technical reports. Subscriptions at \$10 per year may be placed with the Superintendent of Documents, Washington, D. C.
